

ABOUT

PASconcept has developed over several years to meet the needs of A/E firms. It was devised by professional engineers who sought a centralized platform which would allow them to easily manage a project from an administrative standpoint in their daily business operations, and which could be accessed from work, home or anywhere via the internet.

Offers, solutions that cover each step of the way: fee proposals, project opening and closing, timesheet, billing and project finalization. It also provides interaction between the administrators, subconsultants, clients, and employees, allowing business data to be automatically updated as everyone enters information in their respective accounts.

Poses a comfortable easy-to-use alternative that integrates the essential managing options of the main business processes.

Administrator

Oversee projects, subcontracts, clients, employees, fee proposals, billing and other administrative functions through an organized system of interactive data.

Clients

Have complete access to project details, proposals, invoices and estimates issued by the administrator while also quickly choosing to accept or deny proposals.

Employees

Keep track of projects, manage billing, receive personal productivity reports and complete project-specific time sheets with a single site for employee-specific needs.

Subconsultants

Quickly view and respond to proposal requests, easily access project details and information, and receive account

PASconcept is a mobile-friendly site. Manage your projects from anywhere, at any time, using your mobile device.

www.pasconcept.com

For Architectural , Engineering and Survey Firms.

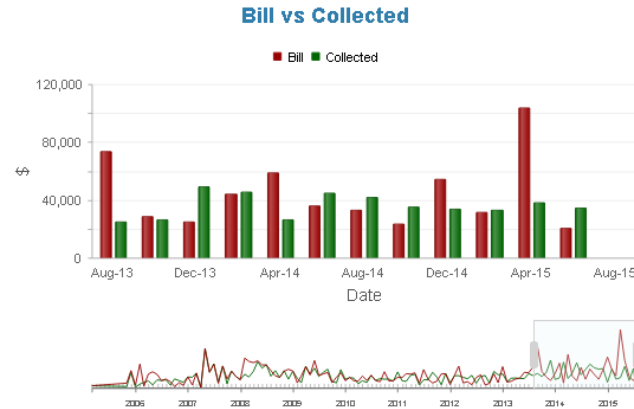

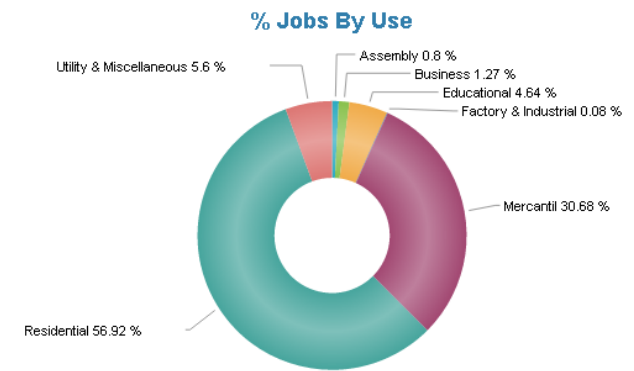

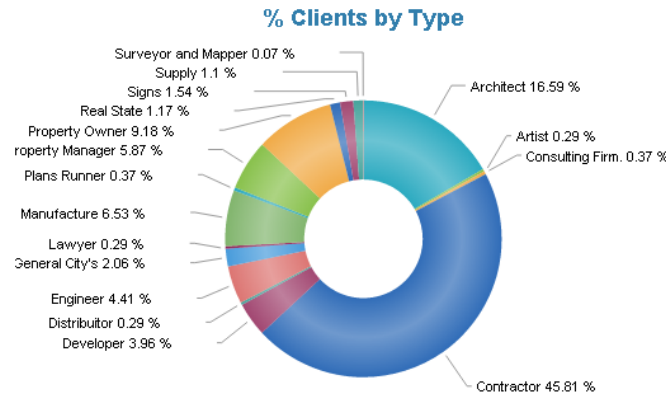

PASconcept is a web-based application designed to provide an all-inclusive management system for architectural, engineering and survey firms that want to facilitate the interaction between administrators, employees, sub-consultants and clients.

Project Management, all your job information is completely organized and ready to be accessed.
